Art Unit: 1714

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 8 and 9 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The recited "said emulsifier" lacks an antecedent basis in claim 1, and thus is indefinite.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1, 2, 3, 4, 7, 10 and 11 are rejected under 35 U.S.C. 102(e) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Buerger et al (US 5,985,299).

Art Unit: 1714

Buerger et al teach a dispersion of removable water-activated adhesive polymer in abstract and at col. 4, lines 1-55 wherein a copolymer of at least 80% by weight of N-vinylformamide and alkyl esters of (meth)acrylic acid is seen (lines 48-55). Additional polymers such as polyvinyl alcohol or poly(vinyl pyrrolidone) are taught at col. 6, lines 42-58. Surfactants (col. 6, line) meet the emulsifier. Said copolymer inherently forms a colloid dispersion especially with polyvinyl alcohol or poly(vinyl pyrrolidone).

With respect to claims 10 and 11, an invention in a product-by-process is a product, not a process. See *In re Brown*, 459 F2d 531, 173 USPQ 685 (CCPA 1972) and *In re Thorpe*, 777 F2d 695, 697, 227 USPQ 964 (Fed. Cir. 1985).

Thus, the instant invention lacks novelty.

Claims 1, 2, 3, 4 and 7-11 are rejected under 35 U.S.C. 103(a) as obvious over Buerger et al (US 5,985,299) and Yeung et al (US 5,376,447) or Tsai et al (US 6,506,340).

The instant claims 8 and 9 further recite nonionic and particular emulsifiers over Buerger et al. However, such nonionic emulsifiers are well known in the art as taught by Yeung et al (col. 6, lines 44-68) or Tsai et al (col. 5, lines 36-53). Yeung et al further teach a protective colloid of polyvinyl alcohol or poly(vinyl pyrrolidone) at col. 7, lines 4-10 which supports the examiner's position in above.

It would have been obvious to one skilled in the art at the time of invention to utilize the art well known emulsifiers of Yeung et al or Tsai et al in Buerger et al since Buerger et al teach employing surfactants (emulsifiers).

Art Unit: 1714

Claims 6 and 13 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
